2 Physical Features

3 USB Diverter Installation

3.1 Install the Skype Software

Note: If you have previously installed the Skype software, proceed to **3.2**

- Insert your Installation CD-ROM into the CD-ROM drive of your computer.
- Click **Install Skype software**. You must have a connection to the Internet since you will need to download this software

from the Skype Website. Follow the on-screen instructions to install and launch the Skype software.

- After downloading the software, you will need to create a Skype account. Follow the on-screen instructions.

3.2 Connect your USB Diverter

- Connect the USB Diverter to an available USB port on your computer with the USB Cable
- Connect the USB Diverter to the PSTN line
- Connect a telephone set to the USB Diverter with the telephone cord
- When you see the POWER and PSTN indicators are activated, that indicates the USB Diverter is connected successfully.

3.3 Install the USB Diverter Software

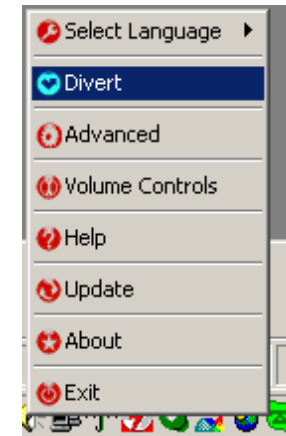

- Insert your Installation CD-ROM into the CD-ROM drive of your computer.
- Click **Install SkypeMate software**. Follow the on-screen instructions to install the USB Diverter software.
- After installing the software, you will be prompted that another program wants to use Skype. Select **Allow this program to use Skype** and click OK.

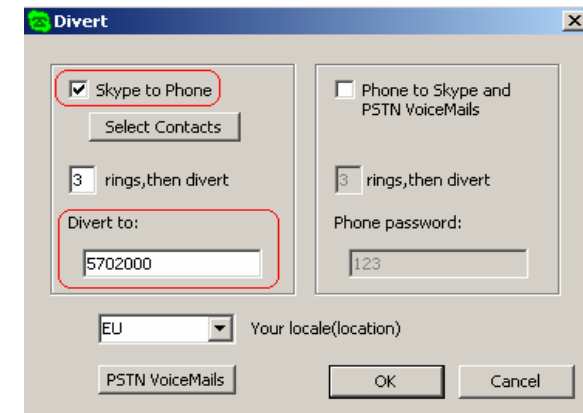

4 Basic Function

4.1 Skype Divert to PSTN

- (1) Right click the icon  on the taskbar and select **Divert**.

- (2) The window shown as below:

- (3) Select **Skype to Phone** to enable the function.
- (4) Set the phone number you would like to divert, in the **Divert to** box. e.g, domestic 5702000, international 00865925702000
- (5) Test the function by doing following steps
- Call in from Skype, the phone rings

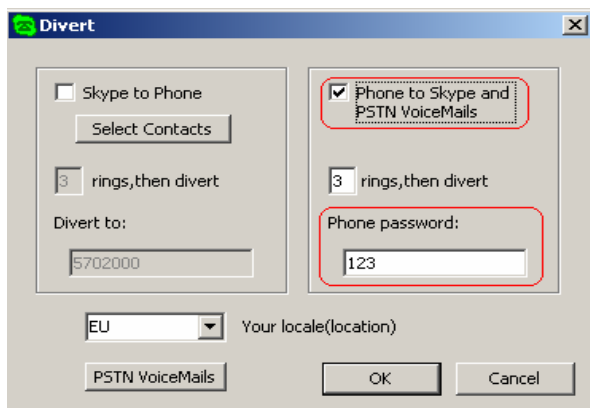

- After 3 rings, all 3 indicators are activated and forward the call to diverted number

4.2 PSTN Divert to Skype

- Right click the icon  on the taskbar and select **Divert**

- The window shown as below:

- Select **Phone to Skype and PSTN VoiceMails** to enable this function
- Set password (required) at the **Phone password** box. e.g.: 123 (minimum 1 maximum 6)
- Test the function by doing following steps
 - Call your USB Diverter Line from your mobile phone, the phone is ringing
 - After 3 rings, all 3 indicators are activated. A voice message can be heard through the mobile phone.
 - Enter your password followed by #(123#) to select the divert function.
 - When you hear the dial tone, enter the Speed-Dial number of your Skype contact followed by #.

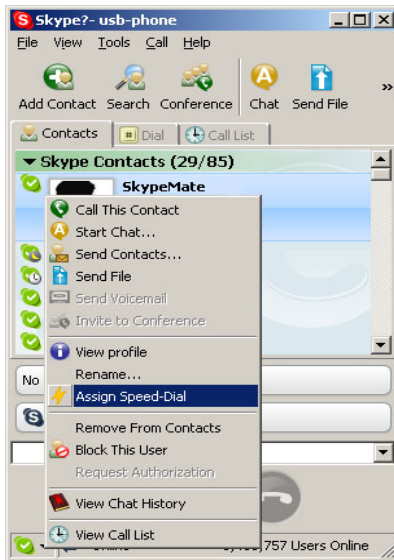

4.3 Make PSTN/Mobile Calls

- Dial the phone number.

4.4 Make Skype Calls

- You will first need to have a list of contacts in Skype. In Skype, click **Add a contact** and follow the on-screen instructions to add a new contact.
- Set up the speed-dial function
 - Right click on contact.

- Click Assign Speed-Dial.
- Enter a speed-dial key, e.g 11, for the selected contact and click OK.

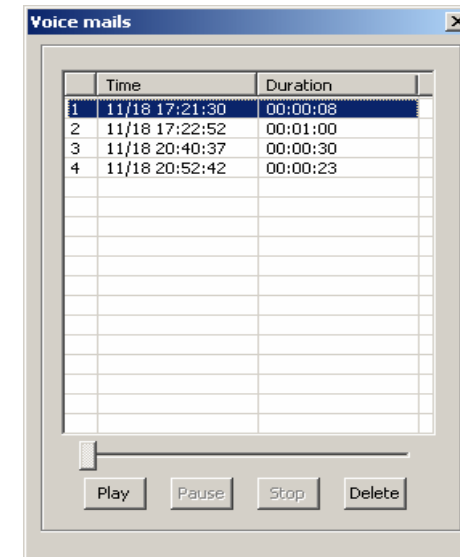

(3) When you call your contact, enter the speed-dial number and press #.

4.5 Receiving a call

The phone connected to the USB Diverter will ring for all incoming Skype and PSTN calls. The corresponding indicator will be activated. Pick up the handset or press the Hands Free key to answer the call.

4.6 Review PSTN Voicemails

Open the **Divert** window. Click **PSTN VoiceMails** button to check the Voicemail list. Select one of the Voicemail and click **Play**.

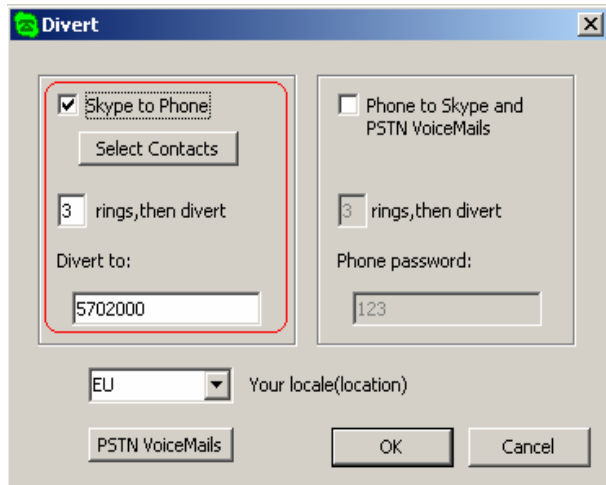

The Voicemail will be played through the default audio device of Windows. To change the default audio device please do following steps:

- Click Windows **Start**, **Control Panel**, double-click **Sounds and Audio Devices**.
- Click on **Audio** and select your primate audio device

5 Advanced

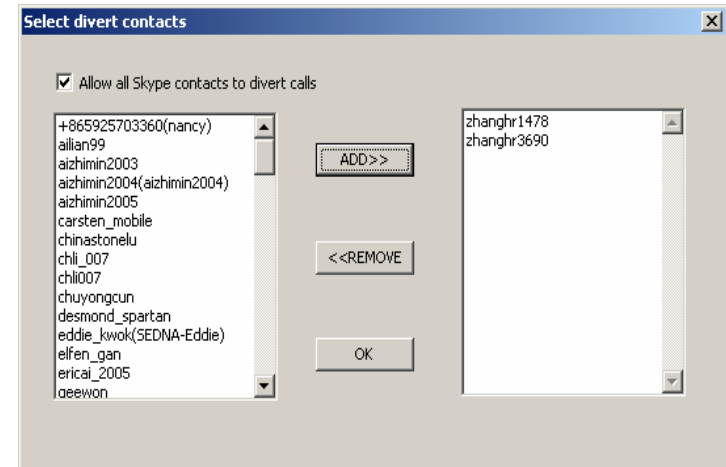

5.1 Set Skype to Phone Divert features

Open the **Divert** window, there are 4 relative features, see below:

- (1) **Skype to Phone:** Enables the **Skype to Phone Divert** function, unselected, disable the function.
- (2) **rings, then divert:** How many rings before diverted.
- (3) **Divert to:** If a phone number is set here, the incoming call will be diverted to this phone always. It can be a PSTN phone number or your mobile phone number.
If the Divert to box is left blank, you can place call to any phone number when hear the dial tone or see the message, "I am out, call me later"

- (4) **Select Contacts:** Click **Select Contacts** button to open the window, see below:

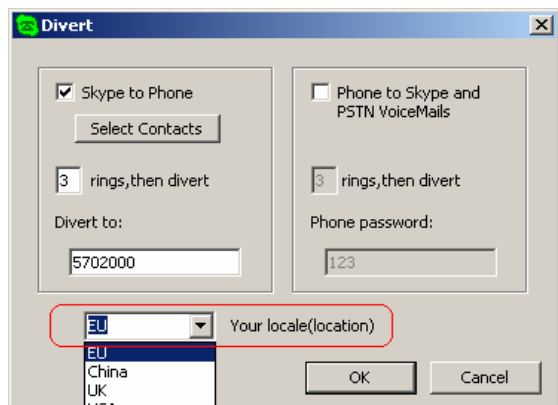

There are two boxes: the right one and the left one. The left one displays all your contacts. The right one lists the contacts calls that will be diverted.

You may add contacts from the left box to the right box or remove contacts from the right box.

Note: The default setup is allowing all contact calls to be diverted.

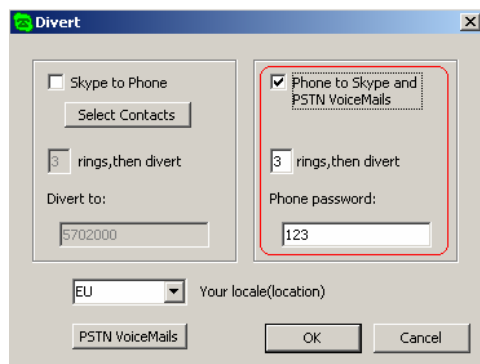

5.2 Set Location

- (1) Open the **Divert** window, see below
- (2) To get high quality voice, please select your location at the drop-menu beside **Your local (location)**.

5.3 Set Phone to Skype and PSTN VoiceMails features

Open the **Divert** window. There are 3 features relative to the **Phone to Skype and PSTN VoiceMail** function , see below:

(1) **Phone to Skype and PSTN VoiceMails:** Enables the **Phone to Skype and PSTN VoiceMails** function, unselected, disable the function.

(2) **rings, then divert:** How many rings before playing VoiceMail.

(3) **Phone password:** Use for ID confirmed. The call will be diverted if you enter the correct password. It can't be left blank.

5.3 Normally Setup

Right-click the USB Phone icon  and click **Advanced**. This will open **Advanced** window. In this window you can configure the following options:

- Select or unselect the **Outgoing call displays Skype window**. If you select this feature, a Skype window will appear when you place a call.
- Select or unselect the **Run when Windows starts** feature. If you select this feature, the USB Phone utility will automatically launch when your computer is turned on.
- Choose 1 of the 2 channels as the default channel. When you finished adjusting these settings, click **OK** for the changes to take effect.

6 FAQ

Problem 1

I am not able to hear any sound through the earphone?

Solution

Please execute the “Control Panel->Sound and Video (🔊)
->Audio”, set **Sound Playback** and **Sound Recording**’s
preference device to your sound card. See below:

Problem 2

I can't play music through the USB Skype Diverter?

Solution

Please execute the “Control Panel->Sound and Video (🔊)
->Audio”, set **Sound Playback** and **Sound Recording**’s
preference device to “USB Audio Device”.

Problem 3

The voice is played from the PC's sound card instead of the
USB Skype Diverter when I make/answer a call?

Solution

Execute “Tools->Options->Sound Devices” to open the
window as below:

Set “Audio In” and “Audio Out” to “USB Audio Device”.

Problem 4

Skype is running, but the icon of SkypeMate still show as 
(the phone is green and the outside is grey)?

Solution

You have selected the wrong option, go to Skype, execute
choose “Tools-> Options-> Privacy-> “Manage other
programs’ access to Skype”, choose the needed option, click
“Change” button to open the “Manage API Access Control”
windows, and make another selection.
